Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Upon the discovery of additional prior art, the Notice of Allowability dated 10 OCT '07 is withdrawn and prosecution is re-opened.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1- 3, 5-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Chang et al, U.S. Patent Publication #2002/0164003, now U.S. Patent #6,700,956.

Chang shows in Fig. 8A a communication apparatus comprising a 1st communication means (11), in form of an analog phone to be sent out over the PSTN, and a 2nd communication means (14) for VoIP to be sent out over the IP network. Also see ¶-0069. Both the 1st and 2nd communication means in Fig 8A use a single communication cable exiting from splitter (112), as applicant does in Fig. 1 of the drawings. Chang et al further disclose a selection or switching means that allows a user to switch/select between the PSTN and IP networks – see ¶¶-0004 and 0011. Chang et al also discloses in ¶-0034 that a user may toggle between calls placed on the PSTN and IP networks. Regarding claim 3, see ¶¶-0043 & 0044. In regard to claim 3, it is only inherent that a second/slave phone is present in Chang's communication system, because if not then there would be no one to talk to.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

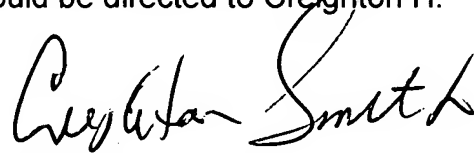

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4, are rejected under 35 U.S.C. 103(a) as being unpatentable over Chang et al in view of Nakajima, U.S. Patent Publication #2006/0153108.

Nakajima discloses in the Abstract a VoIP terminal that also allows facsimile communications. To have provided Chang communication apparatus with a method of sending out a fax, as taught by Nakajima's VoIP terminal would have been obvious to a person having ordinary.

Any inquiry concerning this communication should be directed to Creighton H. Smith at telephone number 571/272-7546.
